

CONTEMPORARY SNIPER RIFLES

Sniper rifles are designed as single shot weapons for long range. Even in the urban field, this kind of attack is awesome : who is able to locate a enemy lying at 500 meters from him ? The most difficult thing, when making a long range attack, is to find a good place to shoot from. That is one which provides a good point of view, and where one can prepare his weapon and wait for his victim without being disturbed. Various equipment (smartlink, scope, laser-assisted aim, computer-assisted aim, bipod, suppressor...) allow maximum accuracy and discretion for modern snipers.

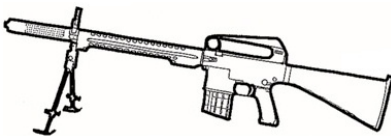

In 2020, users of such weapons are numerous : hired assassins, corporate agents, but also police forces like SWAT. In military conflicts, every squad includes at least one elite sniper, whose goal is to get rid of the lookout, or of another enemy sniper causing harm to the group.

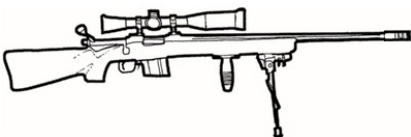

AI Arctic Warfare	
Type : Sniper rifle	Cartridge : 7.62N (5D6+2)
Accuracy : +4	Reliability : very reliable
Availability : Rare	Range : 800 meters
Concealability : Non concealable	Cost : 1950 eb
